Creating a User Account

This page applies to the Enterprise Payment Platform. If you are looking for QuikPay or Commerce Manager, View the <u>QuikPay</u> section.

There are several ways to access the system based on your school's configurations:

Pass-through authentication or Single Sign On (SSO): Student information is prefilled; user will still need to create a pin and security questions.

Student Entered: User can access Enterprise directly or via a specific link provided by the school.

Creating an account through an institution specific link

One way to access the system is via an institution specific link. This link is generally placed on the institution website and directs students to the **Institution Sign In Screen** where they can sign up for a payment plan or manage their account.

Note

Students may not see this screen after the first visit, depending on how they log back in. The custom text you add to this screen should be directed to new users, not returning users.

Step 1: Create a username & password

Assuming the student does not have a user account, click **Create a username & password** on the Institution's Sign In screen.

Step 2: Enter email address

The system will ask for an email address to verify whether a user account already exists.

Step 3: Click Create a new Nelnet account

If no existing account exists, click Create a new NeInet Account.

Step 5: Choose username, password, and security questions

A Nelnet Account consists of:

- Username
- Password
- 4 Digit PIN This PIN will be used for identification if a student has forgotten their password.
- Two Telephone ID Questions These questions are used by Nelnet Campus Commerce student service associates to validate a student's identity when they make inquiries by phone.
